Bug reports

Note: All acceptance criteria for the below bugs should be the same as the descriptions of the expected results.

Bug 1

Summary

- Should display the password format rules when the user fills the password field. Also, the colour of the text box will mislead users.
Environment

- Test environment

Source URL

- https://buggy.justtestit.org/register

Steps to reproduce

- Type password abc in password field:

Register with Buggy Cars Rating

Login

First Name

Last Name
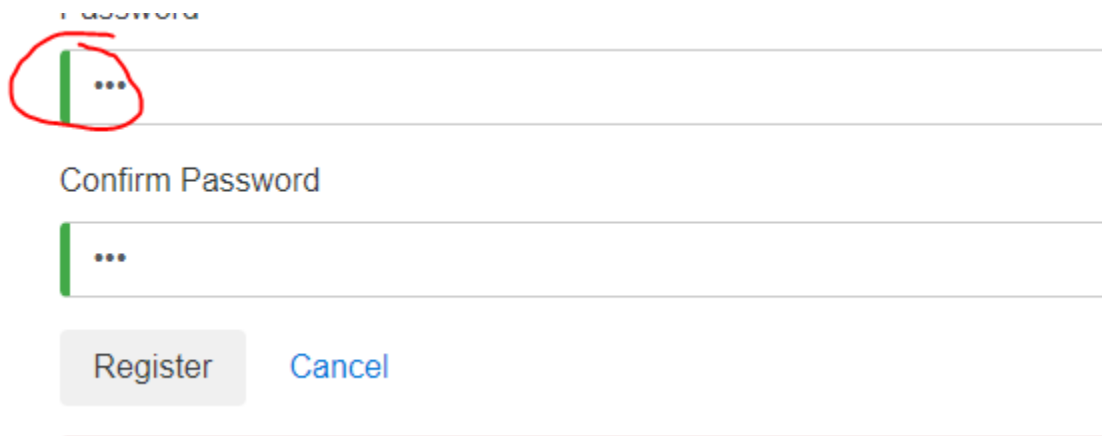

Password

••••

Confirm Password

Register   Cancel

Expected results

1. when the user is typing a password, a prompt message should be displayed at the bottom of the 'Password' text box: "Set the password with a minimum of eight characters (at least include1 Uppercase + 1 lowercase + 1 special character)".

2. When the user types a wrong format password, the text field should still be displayed in red colour.

Actual results

1. No prompt message to remind the user of the rule of password format.

2. Also, when the user types a wrong format password, the text field displays green colour, which will mislead users into thinking that the correct pattern password has been entered.

Password

```

Bug 2

Summary

- The minimum size of the password should be eight characters, not six.

Environment

- Test environment

Source URL

- https://buggy.justtestit.org/register

Steps to reproduce

- Filled out all required register fields:
  - Login – abc
  - First name – ella
  - Last name – lee
  - Passwords -123
  - Confirm password – 123
  - Click 'Register' button at the bottom

Register   Cancel

Expected results

- An error message "The minimum field size should be 8" is displayed.

Actual results

- The error message displays "the minimum field size is 6", not 8 characters.

Bug 3

Summary

- Change text "Login" to "Username", or "Email address" when the user registers a new account.

Environment

- Test environment

Source URL

- https://buggy.justtestit.org/register

Steps to reproduce

- The first text box in register page

Register with Buggy Cars Rating

Login

First Name

Expected results

- Change 'Login' to 'Username' or 'Email address'.

Actual results

- Displayed 'Login' for the first text box will mislead the users that the correct page is the login page, not the register page.

Bug 4

Summary

- There is no forgotten password functionality. Users can change their password in Profile, but they should log in first. Users must re-register another new account if they cannot remember their current password.
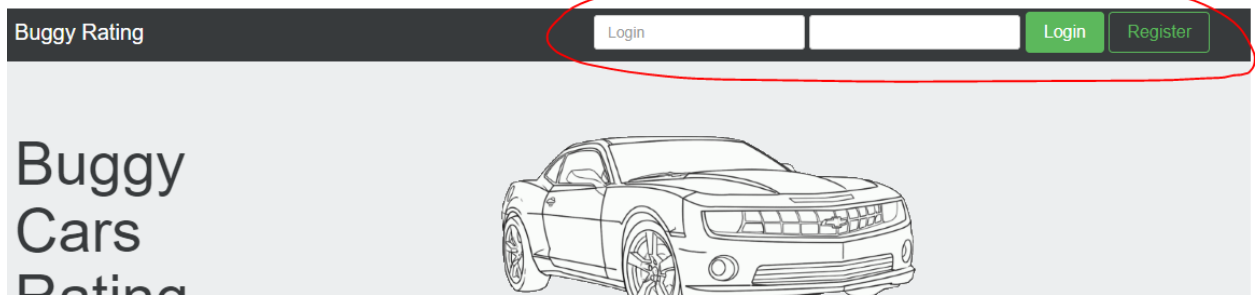

Environment

- Test environment

Source URL

- https://buggy.justtestit.org/register

Steps to reproduce

- At the top of home page:

Expected results

- Should be included functionality to help the user reset their password.

Actual results

- No find password functionality at the moment.

Bug 5

Summary

- An undefined error is displayed in the user profile.

Environment

- Test environment

Source URL

- https://buggy.justtestit.org/register

Steps to reproduce

- Login with valid username and password

- Got to profile

- Type additional info fields as below, most of fields were typed invalid data

Additional Info

Gender

Male

<mark>Age</mark>

<mark>fggf</mark>

Address

jloij

Phone

5675

Hobby

Other

-
- Then click 'Save' button

Expected results

1. When the user enters invalid data for those fields, for example, typed text as Age should display an error notification to remind the user to use the correct data.

2. If entered any data with the wrong format value, it should display a clear error message, like 'Invalid age number.'

Actual results

1. No error notification is displayed even user entered invalid data for those fields.

2. When a wrong format value is entered, an unclear error message is displayed as 'Unknow error.'
